Experience the SEEBURGER Difference

The SEEBURGER API Solution – part of the Business Integration Suite – is German-engineered from the ground up using a single source-code base. This holistic approach means a comprehensive, secure solution for the entire API lifecycle, from creation through publication and management of in-house and business partner APIs.
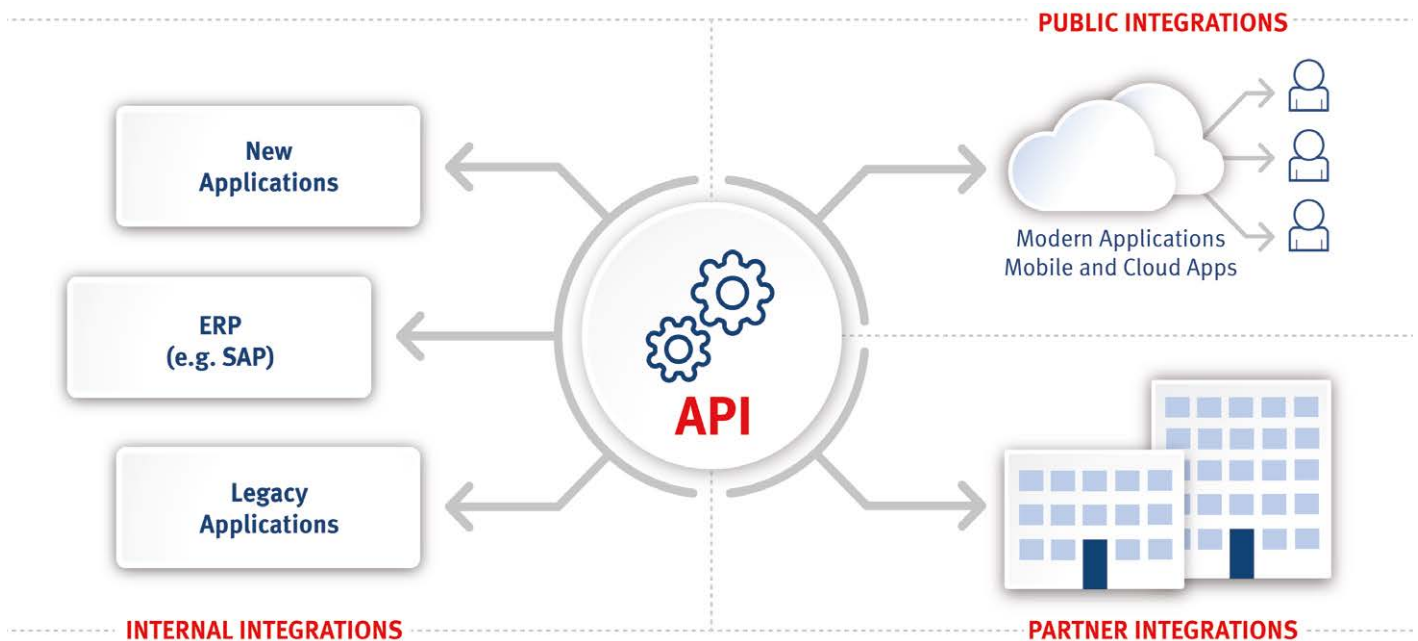

Powerful
SEEBURGER provides a powerful toolkit for both internal and external integration

Flexible
Deploy APIs quickly and easily using the SEEBURGER API tools

Secure
SEEBURGER's API tools provide a security layer that is based on industry standards

Internal
Gain Business Agility & Flexibility

- Existing IT is stable but not agile
- Still need to integrate legacy apps
- API allows easier integration to new applications

Partner
Gain New Business Opportunities

- Real-time collaboration and innovation
- Tailor-made data and functionality
- Deeper level of visibility and control

Public
Develop a Broad Ecosystem

- Allow for faster growth
- Public APIs require careful selection and secure deployment
- Allow for mobile adoption

API Solution Product Features

BIS Server Base
Use core capabilities of our BIS Suite

- ☑ Central user administration
- ☑ Central service for user authentication
- ☑ Adapters for backend integration (Applications, DB, legacy systems)
- ☑ Channel Engine – flow control, choreograph adapter calls, sync and in-memory

BIS API Gateway
API-led integration capabilities

- ☑ Consume external web services
- ☑ Provide web services to internal and external consumers/partners
- ☑ Supported protocols: HTTP, REST, SOAP, XML RPC, JSON RPC
- ☑ Monitoring and statistics of all API-based calls and requests

BIS API Manager
API Developer Portal

- ☑ Manage APIs via API catalog
- ☑ Provide API access rights for users, groups and roles with optional LDAP/AD integration
- ☑ Separate views for API publisher and API user/App developer
- ☑ Interactive testing of APIs
- ☑ API monitoring and usage analysis
